Notes:

- For Brocade please see Brocade Compatibility Matrix
- The matrix is valid for selected Brocade and CISCO FC switches, see original EMC matrices for details
- RSM and OPPM based protection/restoration is available for all modules
- Protection and/or restoration is not tested and qualified by DELL-EMC

* QuadFlex module is used only as a transport card for OpenFab (MA-2C5LT) multiplexer signals, there was no direct client support for QuadFlex tested.

Detailed test reports including switch settings are available on request, please use the web form

The official Dell-EMC compatibility matrix is available on request, please use the web form
